Shakila Sabury

Summary

I am Shakila Sabury, a Computer Science student with a strong focus on Web Design and Front-End Development. I completed four semesters of Computer Science at Herat University, gaining a solid foundation in programming and problem-solving. Although I was unable to continue my formal education due to restrictions on women's access to universities, I have remained committed to advancing my skills through self-directed and online learning.

I am currently developing my expertise in web design, UI/UX principles, and front-end technologies, while also studying the German language. I am highly motivated to combine technical knowledge with creative thinking to design and build responsive, user-centered digital experiences.

In addition to my technical background, I have experience in photography and videography, which has strengthened my visual storytelling skills and enhanced my approach to design and user experience.
